### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

Primary Examiner  
Art Unit 2836 3/27/2008

Art Unit: 2836

The following is an Examiner's Statement of Reasons for Allowance: The claimed combinations found within Independent Claims 1 and 7 are considered to be novel and unobvious in view of the Prior Art of Record. The Admitted Prior Art, Figure 3, illustrates the use of separate wells for the transistor and vertical diode (for Claim 1)/surge absorption element (for Claim 7) upon the same substrate, but is otherwise silent with respect to the other claimed limitations. Kouno et al. (6,365,932) has been relied upon by the Examiner for teachings and suggestions drawn to various operationg relationships between the diode/surge absorption element and the transistor. The Examiner is in agreement with Applicants' instant arguments in that the diode in Figure 91 cannot be accurately considered to be in a diode well or a well separate and spaced apart from the transistor well.

It is, however, apparent from Kouno et al. and from other Prior Art, such as the newly cited references, that there are certain desired relationships between the diode and transistor so as to offer a desired level of protection, but these relationships are dependent upon IC characteristics such as, doping levels, resistivity levels and component layout. It is the opinion of the Examiner that although such relationships as

"said diode has a breakdown voltage that is established at a desired value as a function of a junction depth of said diode, an impurity concentration in said well, a resistivity of said substrate, and a thickness of said substrate" -- Claim 1 or

"the breakdown voltage of the surge absorption element is smaller than the breakdown voltage of the transistor" -- Claim 7

Art Unit: 2836

are in one manner or another suggested throughout in the Prior Art, there does not appear to be strong suggestions or motivations for all the claimed relationships to be combined with the other limitations found in Independent Claim 7

or strong motivation for applying a number of the teachings with a two separate well layout for the transistor and diode, such as illustrated in Figure 3 of Admitted Prior Art so as to meet the claimed combination found within Independent Claim 1.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RONALD W. LEJA whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.
